**PATNA WOMEN'S COLLEGE**

**Autonomous**

**PATNA UNIVERSITY**

3<sup>rd</sup> Cycle NAAC Accredited at 'A' Grade with CGPA 3.58/4  
*"College with Potential for Excellence" (CPE) Status Accorded by UGC*

# Vision

Rooted in the life, vision, and teachings of Jesus Christ and inspired by Mother Veronica, the foundress of the Apostolic Carmel, Patna Women's College strives to become a centre of academic excellence in higher education, social responsibility, and empowerment of women.

## Mission Statement

Patna Women's College, the first college for women in Bihar, is committed to the holistic development of women so as to make an effective contribution to the creation of a better society.

To this end, we strive

- To become a center of excellence in higher education for women in an atmosphere of autonomy.
- To excel in teaching-learning, research, and consultancy.
- To provide education that promotes capacity building and holistic development of a person.
- To offer subjects for competency building and motivate/animate a workforce imbued with human values.
- To promote patriotism, communal harmony and cultural integration to maintain a free and peaceful atmosphere on the campus.
- To train the students in creative arts, social service, critical thinking, and leadership in order to make an effective contribution to the creation of a new and value-based society.
- To create women leaders and to make them agents of social change.
- To develop skill oriented and value-based courses, for the all-round development of individuals.
- To promote academic exchange and academia-industry interface.
- To form young women who are 'always wise' and who will dare to 'go ahead and conquer knowledge' through, competence, commitment, delicate conscience, and compassion.

## **M.A. GEOGRAPHY**

### **Programme Outcome (PO)**

**Upon completion of the course, students will be able to:**

- PO1:** Empower students with a thorough knowledge base of the discipline.
- PO2:** Enable the students with knowledge and skill for spatial thinking, geographical understanding, and systematic analysis to navigate real world problems and contribute to society in a meaningful way.
- PO3:** Develop comprehensive knowledge about geography as a discipline – both its physical and human aspects as well as its contemporary trends.
- PO4:** Gain employment and meaningful research.
- PO5:** Become great citizens, policy makers, environmentalist, social scientists, regional planners and improve the life of people.

### **Programme Specific Outcome (PSO)**

**Upon completion of the course, students will be able to:**

- PO1:** Enhance the in-depth knowledge base regarding different branches of geography, modern and scientific tools, and techniques.
- PO2:** Apply the knowledge gained, for getting through various competitive examinations, especially in the areas of lectureship and civil services.
- PO3:** Provide base for scientific and technological fields of Geo-informatics, Population dynamics, Meteorological and Hydrological studies and so on.
- PO4:** Create quality research ideas and undertake meaningful research based on systematic and scientific techniques.
- PO5:** Create an amicable and healthy living environment with human values, professional ethics, sustainable development, human rights, and gender sensitization.

**PO6:** Apply the knowledge gained for successfully getting through various competitive examinations, especially in the areas of lectureship and civil services and to increase their employability in Census, NIEPA, NCERT and Government Planning Section.

**SEMESTER – I : M.A. GEOGRAPHY**

<b>COURSE OPTED</b>	<b>COURSE CODE</b>	<b>COURSE NAME</b>	<b>CREDITS</b>
<b>CC – 1</b> (Core Course)	<b>MGEO-CC101</b>	Geomorphology	<b>05</b>
<b>CC – 2</b> (Core Course)	<b>MGEO-CC102</b>	Climatology and Oceanography	<b>05</b>
<b>CC – 3</b> (Core Course)	<b>MGEO-CC103</b>	History of Geographical Thought	<b>05</b>
<b>CC – 4</b> (Core Course)	<b>MGEO-CC104</b>	Representation and Analysis of Statistical Data (Practical)	<b>05</b>
<b>AECC – 1</b> (Ability Enhancement Compulsory Course)	<b>MAECC101</b>	Environmental Sustainability Swachcha Bharat Abhiyan Activities	<b>03</b> <b>02</b>

**SEMESTER – IV : M.A. GEOGRAPHY**

<b>COURSE OPTED</b>	<b>COURSE CODE</b>	<b>COURSE NAME</b>	<b>CREDITS</b>
<b>DSE – 1</b> (Discipline Specific Elective)	<b>MGEO-DSE401</b>	A. Urban Geography / B. Political Geography / C. Population Geography / D. Geology of India / E. Settlement Geography / F. Advance Cartography	<b>05</b>
<b>DSE – 2</b> (Discipline Specific Elective)	<b>MGEO-DSE402</b>	Dissertation / Project Work Based on Socio Economic Survey	<b>05</b>
<b>GE – 1</b> (Generic Elective)	<b>MGEO-GE401</b>	A. Regional Planning and Rural Development  <b>Or</b>  B. Geography of Bihar	<b>05</b>

**M.A. GEOGRAPHY (SEMESTER – I)**  
**PAPER – MGEO-CC101 (Core Course – 1)**  
**Geomorphology (5 Credits)**

Time : 3 Hours (ESE)  
Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Remember the processes of geomorphic formation of earth features.

**CO2:** Understand various evolutionary theories providing a concept base of physical geography.

**CO3:** Understand the geomorphic formation of different physical parts of India.

**CO4:** Apply the geomorphic concepts and ideas in practical and scientific pursuits.

**The questions for End Semester Examination Comprises of three parts as mentioned below**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)                      10 x 1 = 10 marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

### **Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

**Unit I**            Theories regarding evolution of Earth's Crust  
Isostasy – Concept, theories and its Application  
Continental Drift Theory and Plate Tectonics  
Theory of Sea Flood Spreading

**Unit II**            **Morphogenic Evolution Models of Davis, Penck and King**  
Models of Slope Formation  
Channel Morphology  
Rejuvenation and Multiple Cycle of Erosion

**Unit III**           **Classification and Evolution of : Arid Landforms**  
Glacial Landforms  
Periglacial landforms  
Karst landforms

**Unit IV**           Geomorphic Evolution of :  
Chotanapur Highlands  
Peninsular India  
Shilling plateau  
Kashmir Himalayas

**Unit V**            Meaning and Scope of Applied Geomorphology  
Application of Geomorphology in engineering projects and oil exploration  
Morphometric Analysis of Drainage basin – Stream Order, Sinuosity Index  
and Drainage Density

**CIA**                ..... 30 Marks

**Selected Readings :**

1.     Williarn, D. Thornbury - Principles or Geomorphology
2.     Savindra Singh – Geomorphology, Pravalika Publications, Allahabad.
3.     Enayat Ahmed - Geomorphology.
4.     P. Dayal- Geomorphology.
5.     Alka Gautam- Geomorphology, Sharda Pustak Bhawan, Allahabad.
6.     V. K. Sharma - Geomorphology of Earth Surfaces
6.     Wooldrige and Morgan - An Outline of Geomorphology
7.     R. N. Tikka - Physical Geography
8.     P. K. Sea and N. Prasad - An Introduction to the Geomorphology of India.
9.     D. S. Lal - Physical Geography
10.    Cotton – Geomorphology
11.    Sparks, B.W. – Geomorphology
12.    Steers, J.A . - Unstable Earth
13.    Strahler, A.H. & Strahler. A.H. - Elements of Physical Geography
14.    Von Engeln., Geomorphology
15.    Duly: Our Mobile Earth

**PAPER – MGEO-CC102 (Core Course – 2)**  
**Climatology and Oceanography (5 Credits)**

Full Marks : 100

Time : 3 Hours (ESE)

ESE :

70 Marks

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Develop basic idea about various climatic phenomena of earth's atmosphere.

**CO2:** Understand the current climate related issues like weather forecasting and climate change consequences.

**CO3:** Evaluate the geography of ocean and its features.

**CO4:** Understand the concept and distribution of marine resources.

**The questions for End Semester Examination Comprises of three parts as mentioned below:**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)  $10 \times 1 = 10$  marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

$4 \times 6 = 24$  marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be

selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

<b>Unit I</b>	Climatology and its Relation with other Sciences Composition and Thermal Structure of Atmosphere Heat Budget and Heat Balance
<b>Unit II</b>	Airmasses: Characteristics, Classification and Distribution Fronts, Types of Fronts and associated Weather Conditions Techniques of Weather Forecasting Cyclones and Anticyclones
<b>Unit III</b>	Theories of climatic change Global Warming: Causes and Consequences El-Nino and La-Nina phenomena in Indian context
<b>Unit IV</b>	Oceanography: Relief Feature, of Ocean Floor Bottom Relief of Indian and Atlantic Ocean Submarine Canyons
<b>Unit V</b>	Theories of Origin of Tides Types of Coral Reef and theories of Coral Reef formation Ocean Deposits
<b>CIA</b>	..... 30 Marks

**Selected Readings:**

1. Savindra Singh – Climatology, Pravalika Publications, Allahabad.
2. D. S. Lal – Climatology,
3. F. Aguado E. and J. E. Bent: Understanding Weather and Climate
4. Alka Gautam – Jalvayu Abum Samudra Vigyan
5. Sharma & Vatal - Oceanography for Geographers

6. Blair. T A . - Climatology-General and Regional.
7. Chorley, R .J. & Barry, R.G.-. Atmospheric Weather and climate
8. Donn. W. L. - Meteorology.
9. Kendrcw, W.G.- Climates of the Continents.

## History of Geographical Thought (5 Credits)

Full Marks : 100

Time : 3 Hours (ESE)

ESE : 70

Marks

CIA : 30 Marks

### **Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Analyse the meaning of geography in context to science and social sciences.

**CO2:** Understand and remember the contributions of ancient and modern scholars in the growth and development of geography.

**CO3:** Evaluate various theories, concepts and ideologies that have shaped the growth of geography as a discipline.

**CO4:** Evaluate the contemporary and modern ideas prevalent in the field of geography.

**The questions for End Semester Examination Comprises of three parts as mentioned below:**

### **Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit) 10

x 1 = 10 marks

### **Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

### **Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be

selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

- Unit I** Place of Geography in Sciences and Social Sciences  
Contribution by Greek and Roman Scholars with special reference to Eratosthenes,  
Herodotus, Aristotle, Plato, Strabo, Ptolemy  
Contribution by Arab scholars  
Development of Geographical ideas in Ancient India
- Unit II** Development of Geography during 19<sup>th</sup> century  
Concept of Space – Absolute, Relative and Abstract and Post-Modern Space  
Development of Modern Indian Geography: Prospects. Problems and Future
- Unit III** Positivism and Pragmatism in Human Geography  
Paradigms in Geography  
Quantitative Geography: Revolution. Merits and Demerits.  
Models – Definition and Types
- Unit IV** Applied Geography  
Behavioural Geography  
Radical Geography  
Humanistic Geography
- Unit V** Structuralism  
Functionalism

Feminism

Post-Modernism

**CIA** ..... 30 Marks

**Selected Readings:**

**PAPER – MGEO-CC104 (Core Course – 4)**  
**Representation and Analysis of Statistical Data (5 Credits)**

Time : 3 Hours (ESE)  
Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the utility and significance of tools and techniques for graphical representation of statistical data.
- CO2:** Apply different statistical tools in geographical studies.
- CO3:** Evaluate the significance test to strengthen their argument with facts and Data.
- CO4:** Apply the knowledge in analysing multifarious data used in social science.

In the End Semester Examination questions will be set preferably from each unit out of which

candidates are required to answer any three questions.

Each Question will carry 20 marks. (20 x 3 = 60 mark)

Practical record and viva voce will comprise 10 marks

**Unit I**            Population Data - Dot Map, Proportionate Circle, Spherical Diagram

**Unit II**           Climatic Data- Wind Rose, Foster's Climograph  
Interpretation of Weather maps

<b>Unit III</b>	Economic Data - Band Graph. Ergograph Density of Population - Choropleth and Isopleth Method
<b>Unit IV</b>	Statistical data - Correlation. Regression and Nearest Neighbour Analysis
<b>Unit V</b>	Practical Record and Viva-Voce
<b>CIA</b>	..... 30 Marks

**PAPER – MAECC-101 (Ability Enhancement Compulsory Course)**

**A. Environmental Sustainability (03 Credit)**

**B. Swachha Bharat Abhiyan Activities (02 Credit)**

Full Marks : 100

Time : 2 Hours (ESE)

ESE : 50

Marks

CIA : 50 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Understand the concept of environmental Sustainability.

**CO2:** Understand the concept and types of natural resources and environmental pollution.

**CO3:** Evaluate the anomalies created due to haphazard population growth and its impact on biodiversity and population.

**CO4:** Understand the concept of Swachha Bharat Abhiyan and importance of cleanliness.

**A-Unit- 1** Environmental ethics & ecosystem: Concept of sustainable development with reference to human values in western and Indian perspective, sustainable development & conservation of natural resources (Nature, factors, structure, development, and people participation) development, environment- rural and urban, concept of Ecosystem

**A-Unit-2** Development and its effect on environment: Environment pollution- water, air, noise etc. due to Urbanization, Industrial civilization, Concept of Global Warming, Climate change, Green House Effect, Acid rain, Ozone layer

depletion, Menace of encroachment to impact on habit & habitat on indigenous flora & fauna.

**A- Unit-3** Concept of Biodiversity and its conservation: environment; degradation and conservation Govt Policies, Social effects and role of social reforms in this direction. Role of scientific conservation of environmental concept of Three 'R' (reduce, reuse, recycle). Need of environmental education and awareness programme and ecological economics.

**B-Unit- 4** **Swachha Bharat Abhiyan:** The concept of Swachhata as personal, Gandhian approach towards social and environmental moral values & concept of swachhata and its relation to moral Upgradation of society and freedom struggle, Awareness programme related to Swachhata. Role of 'Swachchagrahis' in Swachha Bharat Abhiyan.

Sanitation and hygiene, why sanitation is needed, sanitation and human rights, plantation, values of nature, concept of community participation and role of state agencies. Case study of Sanitation, effects of cleanliness, diseases- infectious and vector- borne ideas of spread of diseases through body and other biological fluids and excreta.

**B-Unit- 5** Assignment/ Practical/ field work based on Unit- 4

*or*

Alternative to unit – 4 and unit- 5, a student can also enrol for Swachha Bharat Internship programme of MHRD

**M.A. GEOGRAPHY (SEMESTER-II)**

**PAPER – MGEO-CC205 (Core Course – 5)**

**Regional Planning and Rural Development (5 Credits)**

Time : 3 Hours (ESE)

Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Understand the basic concept and processes of regional planning.

**CO2:** Evaluate the approach to the rural planning and development process in the Indian context.

**CO3:** Apply the planning processes and mechanism in further useful geographical applications and case studies.

**CO4:** Apply the knowledge to start NGO or Self-Help Group or start-up.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)  $10 \times 1 = 10$  marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

$4 \times 6 = 24$  marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

$3 \times 12 = 36$  marks

**Unit I**      Regional Planning: Concept, Merits and Limitation

Planning Process – Sectoral, Temporal and Spatial Dimensions  
Concept or Planning Region and Methods for Delineation of Regions

**Unit II** Special Purpose Planning Regions in India:  
River Valley Regions  
Metropolitan Region  
Problem Regions – Hilly Regions, Tribal Regions

**Unit III** Indicators of Development  
Regional disparities in India  
Need for Regional Planning in India  
Regional Development in India Problems and Prospects

**Unit IV** Concept of Multi level Planning  
Role of Panchayati Raj Institutions in Rural Development  
Defining: Development and Rural Development: Gandhian approach to rural development

**Unit V** Area Based Approach to Rural Development: Drought Prone Area Programme. PMGSY  
Target Group Approach: SJSY, MGNREGA, Jan Dhan Yojana and PURA  
Provision of Services- Physical and Socio-Economic Access to Elementary Education and Primary Health Care and Micro Credit

**PAPER – MGEO-CC207 (Core Course – 7)**  
**Resource and Economic Geography (5 Credits)**

Time : 3 Hours (ESE)  
Marks

Full Marks : 100  
ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the meaning of resources, and the concepts of resource and economic geography.
- CO2:** Evaluate the models and theories regarding agricultural location, agricultural regions, industrial location, and international trade.
- CO3:** Apply the usage of non-conventional energy resources and their management.
- CO4:** Apply the conservation and protection methods for natural resources, energy means and agricultural produce.

**The questions for End Semester Examination Comprises of three parts as mentioned below**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)  $10 \times 1 = 10$  marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  
 $4 \times 6 = 24$  marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  
 $3 \times 12 = 36$  marks

<b>Unit I</b>	<p>Meaning and Scope of Economic Geography.</p> <p>Conservation and Management of Resources with special reference to:</p> <p>(a) Water Resources</p> <p>(b) Biotic Resources</p> <p>Conventional Energy Resources: Coal, Petroleum, their Distribution. Production and Conservation</p> <p>Non-Conventional Energy Resources and their Management.</p>
<b>Unit II</b>	<p>Weber's Model and Smith's Model of Industrial location</p> <p>Iron and Steel Industry of the World with special reference to China and India</p> <p>Petro-Chemical Complexes with Reference to India</p>
<b>Unit III</b> ore and	<p>Distribution and production of some minerals in the World: Iron Ore. Copper</p> <p>Atomic minerals</p> <p>Industrial regions of USA and Japan</p> <p>Inter-regional and intra-regional trade</p>
<b>Unit IV</b>	<p>Agricultural Regions of the World</p> <p>Von Thunen's Model of Agricultural Location</p> <p>Food Production, Problems and Food Security</p>
<b>Unit V</b>	<p>World Trade Theories and Pattern</p> <p>Impact of Globalization on World Economy</p> <p>Role of WTO in World Trade</p> <p>Concept of Export Processing Zone and SEZ (Special Economic Zone)</p>
<b>CIA</b>	<p>..... 30 Marks</p>

**PAPER – MGEO-CC209 (Practical) (Core Course-09)**  
**Cartographic Techniques (5 Credits)**

Time : 3 Hours (ESE)  
Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Remember the representation of mathematical and statistical data with the help of cartographic tools and techniques.
- CO2:** Understand the significance and relevance of cartograms, cartographic tools and map making in geographical studies.
- CO3:** Apply the cartographic techniques with accuracy and efficiency for geographical studies and research.
- CO4:** Articulate the Knowledge of modern cartographic technique.

In the End Semester Examination questions will be set preferably from each unit out of which

candidates are required to answer any three questions.

Each Question will carry 20 marks. (20 x 3 = 60 marks)

Practical record and viva-voce will comprise 10 marks

**Unit I** Cartograms: Hypsographic. Climographic and Altimetric Frequency Curve

**Unit II** Relief Profiles: Serial. Superimposed. Composite and Projected.  
Slope Analysis by: Smith, Henry and Wentworth Methods

**Unit III** Map Projections: Mercator's, Sinusoidal, Gall's and International  
Projection

**Unit IV** Interpretations of Aerial Photographs, Satellite Imagery

## Geological section and Interpretation of Geological Maps

**Unit V** Practical Record and Viva-Voce

**CIA** ..... 30 Marks

### **M.A. GEOGRAPHY (SEMESTER - III)**

#### **PAPER – MGEO-CC310 (Core Course – 10)**

#### **Quantitative Techniques and Research Methodology (5 Credits)**

	Full Marks : 100
Time : 3 Hours (ESE)	ESE : 70
Marks	CIA : 30 Marks

#### **Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the steps and techniques of social science research.
- CO2:** Understand the importance of quantitative tools and techniques in geographical research.
- CO3:** Apply and implement the correct methodology for a quality research work.
- CO4:** Create their own research ideas using proper methods and quantitative tools.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)  $10 \times 1 = 10$  marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  
 $4 \times 6 = 24$  marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  $3 \times 12 = 36$  marks

**Unit I** Quantitative Methods in Geography: Merits and limitations, Research types and Methodology, Research Problems and Research Design, Review of literature

**Unit II** Data collection and classification, Questionnaire and Schedules. Sampling Types – Random, Stratified and Purposive.

**Unit III** Hypothesis: Concept and Types, Procedure for Hypothesis Testing, Chi-Square Test, Student's 't' Test

**Unit IV** Correlation Coefficient Techniques-Pearson and Spearman, Simple Linear Regression Analysis. Analysis of Variance (ANOVA), Multivariate Analysis-Importance and its Application

**Unit V** Models and Analogue, Types of Model, Gravity Potential Model, Population Potential Model

**CIA** ..... 30 Marks

**Note: Use of MS-EXCEL shall be promoted during the classroom teaching**

**Selected Readings:**

**PAPER – MGEO-CC311 (Core Course – 11)**

**Remote Sensing and Geographical Information System (5 Credits)**

Full Marks : 100

Time : 3 Hours (ESE)

ESE : 70

Marks

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Understand the significance of Remote Sensing in geographical studies.

**CO2:** Understand the mechanism and stages of Remote Sensing – the platforms, sensors and resolutions.

**CO3:** Apply the GIS tool for geo-referencing, land information system, urban and disaster management.

**The questions for End Semester Examination Comprises of three parts as mentioned below**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)                      10 x 1 = 10 marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

- Unit I**        Meaning and Definition of Remote Sensing, Historical Development, Significance and Utility of Remote Sensing in Geography.
  
- Unit II**        Remote Sensing Platform, Geo-Stationary and Sun-Synchronous Satellites:  
LANDSAT, IRS and QUICK- BIRD Series.
  
- Unit III**        Sensors and Resolution, Interpretation of Aerial Photographs and Satellite Imagery.  
Digital Elevation Model (DEM)
  
- Unit IV**        Concept and Principles of GIS, Elements of GIS, Nature and Source of Data, Projection and Georeferencing, Digital cartography.
  
- Unit V**        Raster Vs. Vector Data structure, G.P.S. :- Concept and Applications. Application of Remote Sensing and GIS : Land Information System, Urban Management and Disaster Management.

**CIA** ..... 30  
Marks

**Selected Readings:**

## Human and Social Geography (5 Credits)

Full Marks : 100

Time : 3 Hours (ESE)

ESE : 70

Marks

CIA : 30 Marks

### **Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the concept and approaches to human geography and human settlement.
- CO2:** Evaluate the processes, pattern, and composition of world population.
- CO3:** Evaluate the conceptual aspects of social geography and the related concepts.
- CO4:** Apply the human and social patterns to socio-cultural transformation and uplifting quality of social life.

**The questions for End Semester Examination Comprises of three parts as mentioned below**

### **Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)      10 x 1 = 10 marks

### **Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  
4 x 6 = 24 marks

### **Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

- Unit I**      Meaning, Definition and Scope of Human Geography  
Approaches to Human Geography, Critical Human Geography  
Growth, Distribution and Density of World's Population  
Migration: Causes and Consequences
- Unit II**      Human Settlement : Types and Patterns of Rural Settlements.  
Processes and Pattern of Urbanization in the World. (Urbanization and Related problem)  
Age and Sex Composition of the World Population  
Occupational Structure of the World Population
- Unit III**      Meaning and Scope: of Social Geography  
Cultural Evolution of Man  
Major Human Races in the World- Negroid, Mongoloid. Caucasoid  
Major World Religions: Their Origin, Diffusion and Spatial Distribution,  
Major World Languages: Their Origin. Diffusion and Spatial Distribution.
- Unit IV**      Concept of Social Justice and Social Well-being.  
Social Structure, Process and Social Pattern.  
Components of Quality of Life and its Spatial Pattern  
Globalization and Social Transformation.
- Unit V**      Recent Changes in Urban and Rural Social Life in India,  
Panchayati Raj Institution and Social Transformation in India,  
Social Ecology and Social Media in India.

**PAPER – MGEO-CC313 (Core Course – 13)**  
**Land Use and Agriculture Geography (5 Credits)**

Time : 3 Hours (ESE)  
Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the meaning, concept and scope of land use and agricultural geography.
- CO2:** Understand and remember the models and classifications of land use of India and some other countries.
- CO3:** Evaluate the agricultural systems and patterns of the world with special reference to India.
- CO4:** Evaluate the modern agricultural technology, agricultural policies, and emerging problems.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)      10 x 1 = 10 marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

## Part – C

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

**Unit I**      Meaning and Scope of Landuse and Agricultural Geography  
History of Landuse survey  
Model of Landuse : Von Thunen, Jonassan  
Major Land Reforms in India

**Unit II**      Landuse classification: U. K. and India  
Landuse pattern in India  
Land capability classification  
Planning of Landuse in India

**Unit III**      Fundamental concept of Agriculture Geography  
History of Agriculture Geography  
Factors influencing Agricultural Pattern  
Agricultural Systems of the world

**Unit IV**      Concept and Techniques of delimitation of agricultural regions  
Measurement of Agricultural productivity and efficiency  
Crop-combination and diversification  
Cropping pattern in India

**Unit V**      New Agricultural Technology  
Green Revolution and White Revolution in India

Agro-climatic regions of India  
Agricultural problems and policies

**PAPER – MGEO-CC314 (Core Course – 14)**  
**Instrumental Surveying, GIS and GPS (5 Credits)**

In the End Semester Examination questions will be set preferably from each unit out of which candidates are required to answer any three questions,

Each Question will carry 20 marks. (20 x 3 = 60 marks)

Practical record and viva voce will comprise 10 marks.

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Understand the importance and use of field survey methods of geography.

**CO2:** Apply the survey instruments for preparation of ground plans and profiles.

**CO3:** Apply the digital methods of geo-referencing and map preparation

**CO4:** Prepare scientific and technically sound digital maps and plans using GIS/  
GPS

<b>Unit I</b>	Survey by Levelling instrument Finding out Rise and Fall Plotting of Longitudinal Profile
<b>Unit II</b>	Theodolite Survey: Formation and Calculation of Triangles Preparation of Ground plan and Ground Profiles Measurement or Base line and its extension Formation of Polygon
<b>Unit III</b>	Georeferencing using GIS Map Registration using MIS
<b>Unit IV</b>	Digitisation and Map Preparation using GIS Surveying through hand held GIS
<b>Unit V</b>	Practical Record and Viva-Voce

**Note: Departments are requested to introduce open source software like Q GIS**

**Selected Reading:**

**A. Human values and professional Ethics (3 credits)**

**B. Gender Sensitization (2 credits)**

**Unit: 1**      **Variety of Moral Issues, principals of Ethics and Morality :**  
Understanding the harmony in the society (society being an extension of family), Integrity, Work ethics, Courage, Empathy, Self Confidence, Professional Ideas and Virtues, Ethics as a Subset of Morality, ethics and Organizations, Duties and Rights of employees and employers.

**Unit : 2**      **Holistic approach to corporate ethics :** Vendantic ethics- Tagore, Vivekananda, Gandhi and Aurobondo on ethics, Ethics in Finance, Business and Environment, Professional Rights, Intellectual property rights, Corporate responsibility, Social Audit and Ethic Investing, Computer and Ethics.

**Unit : 3**      **Professional Ethics**      : Augmenting Universal Human Order, Characteristics of people- friendly and eco-friendly production, Strategy for Transition from the Present state to Universal Human Order, At the level of Individual- as Socially and Ecologically Responsible Technologists and managers, at the Level of Society- as Mutually Enriching Institutions and organizations. case studies of typical holistic technologies and management patterns.

**Unit: 4**      **Gender- An overview :** Gender: Definition, nature and evolution, culture, tradition, histocrity, Gender spectrum: biological sociological , psychological conditioning, Gender based division of labour- domestic work and use value.

**Unit: 5**      **Gender- Contemporary perspectives :** Gender justice and human rights: international perspectives, Gender: constitutional and legal perspectives, media and gender, Gender: emerging issues and challenges.

**M.A. GEOGRAPHY (SEMESTER - IV)**

**PAPER – MGEO-DSE401 (Discipline Specific Elective -01)**

**A. Urban Geography (5 Credits)**

Full Marks : 100

Time : 3 Hours (ESE)

ESE : 70

Marks

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the meaning and scope of urban geography and functions of urban centres.
- CO2:** Understand the various concepts related to urban geography such as urban ecology, urban systems, urban morphology, City Region, umland and urban fringes.
- CO3:** Evaluate theories presented in the fields of urban land use.
- CO4:** Apply the knowledge into policy formulation for urban planning, slum improvement, eradication of urban poverty and development of smart cities.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)  $10 \times 1 = 10$  marks

### **Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

$4 \times 6 = 24$  marks

### **Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

$3 \times 12 = 36$  marks

**Unit I** Definition and Scope of urban geography. Development of urban geography in India

Urban ecology and Urban System

Basis of urban functions and functional classification of towns

**Unit II** Rank-Size Rule and Primate City

Urban hierarchy

Million Cities and Mega Cities

Concept of Megalopolis and Metropolitan regions

**Unit III** Concept of urban morphology

Theories of urban landuse – Burgess, Hoyt, Harris and Ullman

Concept and characteristic of CBD

Conurbation, Urban Agglomeration in context of India

**Unit IV** Trend of Urbanization in India and the World

Concept of City region  
Concept of Umland  
Rural urban fringe

**Unit V** Urban problems with reference to slums  
Urban poverty  
Urban planning policies in India  
Smart city concept

**CIA** ..... 30 Marks

**Selected Readings:**

1. Carter, H. (1972) The Study of Urban Geography, Arnold Heinemann
2. Geddes, P. (1968) Cities in Evolution, Benn Publication
3. Hall. P. (1992) Urban & Regional Planning, Routledge, London

**PAPER – MGEO-DSE401 (Discipline Specific Elective -01)**

**B. Political Geography (5 Credits)**

Time : 3 Hours (ESE)  
Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the concepts and theories related to political geography, its approaches, and functional aspects.
- CO2:** Understand the global political strategies, geo-political issues, and nation-state dynamics in the context of world political order.
- CO3:** Apply the geo-political ideas for thinking on the lines of inter-state water disputes, border issues, regionalism problems etc.
- CO4:** Comprehend the knowledge as political analyst in electronic or print media.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)      10 x 1 = 10 marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

- Unit I**      Meaning and scope of Political Geography:  
Approaches to Political Geography: Functional and Unified Field Theory  
Approaches  
Geopolitics: Classical Geopolitics and Critical Geopolitics
  
- Unit II**      Geopolitical World Order: Origin and Cessation of cold war:  
Global Strategic Views: H.J. Mackinder. N.G. Spykman.  
Geopolitics of Asia-Pacific
  
- Unit III**     Concept of Nation and State  
Land-Locked States  
Frontiers and Boundaries  
Maritime Boundaries
  
- Unit IV**     Changing Political map or India: State re-organization  
Geographical Bases of Indian Federalism  
River water Disputes – International and National
  
- Unit V**      Sino-Indian Border Dispute  
Kashmir Problem  
Geopolitics of Indian Ocean: Sino Indian Rivalry  
Regionalism in India  
Geopolitical codes of India

**CIA** ..... 30 Marks

**PAPER – MGEO-DSE401 (Discipline Specific Elective -01)**

**C. Population Geography (5 Credits)**

Time : 3 Hours (ESE)

Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Understand the nature and growth of population geography.

**CO2:** Evaluate the growth, distribution, composition, and migration of population in Indian context.

**CO3:** Apply the theories of population growth and demographic transition into current circumstances.

**CO4:** Apply the dynamics of population in determination and measurement processes of fertility, mortality, migration, and urbanization.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit) 10 x 1 = 10 marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

<b>Unit I</b>	Nature and Scope of Population Geography, Historical development of Population Geography. Relationship with Demography. Sources of Population Data: The Census, vital registration and other sources.
<b>Unit II</b>	Population distribution, growth and determinants: Pre-historic, ancient, medieval and modern period; Theories of Population Growth: Malthus, Marx and Demographic Transition
<b>Unit III</b>	Population Dynamics: Fertility-measurement; Mortality measurement, determinants and distribution; Migration: Brief history, trends and pattern or international migration, migration in India, Indian Diaspora.
<b>Unit IV</b>	Population Regions: Typology or population regions, Ackerman scheme of population resource region. Human security – economic, food and health.
<b>Unit V</b>	Growth and distribution of population in India Population composition of India Internal migration in India Trends of urbanization Urban problems
<b>CIA</b>	..... 30 Marks

**D. Geology of India (5 Credits)**

Time : 3 Hours (ESE)

Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the scope and functions of geology in context to stratigraphic scales.
- CO2:** Evaluate the geological history and lithology of different physical sections of India.
- CO3:** Evaluate the geological classifications of rock formations, minerals, and energy resources of India.
- CO4:** Apply the knowledge in higher studies and specialized knowledge.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit) 10 x 1 = 10 marks

## Part – B

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

## Part – C

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

<b>Unit I</b>	Definition, scope and function of Geology, Principles of correlation. Standard Stratigraphic scale, Indian Stratigraphic scale.
<b>Unit II</b>	Origin, geographical distribution and lithological characteristics of Dharwar system. Vindhyan system, Gondwana system and Deccan Lava system
<b>Unit III</b>	Classification, mode of occurrence and distribution of the following minerals with special reference to India – Iron ore, Mica, Bauxite and Copper .
<b>Unit IV</b>	Classification mode of occurrence and distribution of energy resources in India: Coal, Petroleum, Uranium and Thorium
<b>Unit V</b>	Rocks and mineral association, form, structure and classification of igneous rocks, Origin and types of sedimentary rocks, Process of metamorphism, Types

and  
characteristics of metamorphic rocks.

**E. Settlement Geography (5 Credits)**

	Full Marks : 100
Time : 3 Hours (ESE)	ESE : 70
Marks	
	CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Understand the meaning of settlement geography and development of settlements.

**CO2:** Evaluate the evolution, types, characteristic features, morphology and problems of rural settlements.

**CO3:** Evaluate the locations, functions, morphology and problems of urban settlements.

**CO4:** Apply the knowledge base in the settlement planning process for rural and urban areas.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)  $10 \times 1 = 10$  marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  
 $4 \times 6 = 24$  marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  
 $3 \times 12 = 36$  marks

**Unit I**      Meaning and Scope of Settlement Geography  
Development of Settlement Geography in India  
Evolution of Settlement in the Middle Ganga Valley  
Types or Rural settlement in India

**Unit II**     Old Sites of Settlements and Nomenclature  
Development of Different forms of Rural settlements

Morphological features of Rural Settlements  
Problems of rural settlements

**Unit III** Rural house types in different geographical environment in India  
Rural Urban continuum  
Rural Service centres  
Hierarchy of settlements

**Unit IV** Locational and functional features of urban settlements  
Morphological features of Indian cities  
Problems of Indian urban centres  
Problems of slums in India

**Unit V** Planning of Rural settlements  
Planning of urban settlements  
Metropolitan region  
Planned urban centres of India

**CIA** ..... 30 Marks

**Selected Readings :**

1. Hopkinson, D. (1989) Geography of Settlement, Oliver & Boyd
2. Hudson. F. S. ( 1970) Geography of Settlement. Mackold & Erau.

**PAPER – MGEO-DSE401 (Discipline Specific Elective -01)**

**F. Advance Cartography (5 Credits)**

Time : 3 Hours (ESE)

Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the principles of cartography for map making and field surveys.
- CO2:** Understand the techniques of photogrammetry and aerial photography.
- CO3:** Apply the computer-based cartography in preparation of thematic maps.
- CO4:** Apply the remote sensing techniques for interpretation of satellite imageries.

**The questions for End Semester Examination Comprises of three parts as mentioned below.**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)                      10 x 1 = 10 marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)  
4 x 6 = 24 marks

**Part – C**

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

- Unit I** Brief history of cartography and its present status;  
Fundamentals or computer based cartography and its application;  
Thematic maps–types and their use.
- Unit II** Mathematical construction and characteristics of the following map projections –  
Conical Equal- Area with one standard parallel (Lambert's V); Gnomonic projection  
(Equatorial Case); Stereographic projection (Equatorial Case); Cassini's Projection
- Unit III** Principles of triangulation Survey: Measurement of base-line in triangulation survey,  
Definition and characteristics of the following astronomical terms – Azimuth, Right  
Ascension, Hour Angle, Star at elongation, Altitude, Declination.
- Unit IV** Brief history and basic principle of Photogrammetry:  
Types and scale' or aerial photographs,  
Interpretation of aerial photographs.
- Unit V** Brief history of satellite remote sensing:  
Concept of remote sensing;  
Development of remote sensing in India.  
Elements or the interpretation of satellite imageries,

**PAPER – MGEO-DSE402 (Discipline Specific Elective -02)**

**Dissertation / Project Work (5 Credits)**

Full Marks : 100

ESE : 70 Marks

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

- CO1:** Understand the methodology and design of social science research.
- CO2:** Understand and learn the techniques of data collection, sampling, and household surveys.
- CO3:** Evaluate and interpret the primary data with cartographic/ statistical treatment.
- CO4:** Create and prepare a detailed report in the form of dissertation.

Students have to prepare a Dissertation / Project work based on Socio-Economic survey.

The topic will be approved by departmental council.

ESE will consist of total of 70 marks, out of which, 45 marks will be on a written test and 25 marks for Viva Voce on dissertation. CIA will comprise of written test, presentation, and brief summary of report.

Students have to submit one copy of dissertation / Project work report prior to the commencement of the semester examination.

**Unit I** Procurement of a topographic map or 1:50,000 to 1:25,000 scale to study the settlements selected in its regional setting.

**Unit II** Collection of demographic, social & economic data of the village/town from Census Reports to study the temporal changes in the profile of such characteristics

**Unit III** Selection or sampling site, defining sampling size, and conducting socio-economic survey at households level with a self- structured questionnaire and supplementing the information by personal observations and perceptions.

**Unit IV** Based on results of the land-use and socio-economic survey of the households, preparation of a critical field-survey report, Photographs and sketches, in addition to maps and diagrams may supplement the report.

**CIA** ..... 30

Marks

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

4 x 6 = 24 marks

## Part – C

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

- Unit I**      Regional Planning: Concept, Merits and Limitation  
Planning Process – Sectoral, Temporal and Spatial Dimensions  
Concept of Planning Region and Methods for Delineation of Regions
- Unit II**      Special Purpose Planning Regions in India:  
River Valley Regions  
Metropolitan Region  
Problem Regions – Hilly Regions, Tribal Regions
- Unit III**      Indicators of Development  
Regional disparities in India  
Need for Regional Planning in India  
Regional Development in India – Problems and Prospects.
- Unit IV**      Concept of Multi Level Planning  
Role of Panchayati Raj Institutions in Rural Development  
Defining Development and Rural Development: Gandhian approach to rural development
- Unit V**      Area Based Approach to Rural Development: Drought Prone Area Programme,  
PMGSY  
Target Group Approach: SJSY, MGNREGA, Jan Dhan Yojana and PURA  
Provision of Services- Physical and Socio-Economic Access to Elementary

Education  
and Primary Health Care and Micro Credit

**B. Geography of Bihar (5 Credits)**

Time : 3 Hours (ESE)

Marks

Full Marks : 100

ESE : 70

CIA : 30 Marks

**Course Outcomes:**

**After completion of the course, the students will be able to:**

**CO1:** Understand the physical characteristics of Bihar.

**CO2:** Comprehend the climatic variations of the State.

**CO3:** Analysis the Flood and Drought problems of the State.

**CO4:** Evaluate the current scenario of agriculture, industries and population of the State..

**The questions for End Semester Examination Comprises of three parts as mentioned below**

**Part – A**

Ten objective type Questions – All questions to be answered (Questions shall be selected from the whole syllabus preferably two questions from each unit)  $10 \times 1 = 10$  marks

**Part – B**

Five short Answer Questions – Four questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

$4 \times 6 = 24$  marks

## Part – C

Five long Answer Questions – Three questions to be answered (Questions shall be selected from the whole syllabus preferably one question from each unit)

3 x 12 = 36 marks

- Unit I** Historical Account of Bihar as a State.  
Geological Formation and Landforms, Physiographic Divisions, Drainage, Soils  
River Valley Projects: Gandak, Kosi and Sone
- Unit II** Climate: Regional Variation in Rainfall and Temperature, Seasonal Variation of  
Rainfall and Temperature  
Flood and Drought Prone Areas, Wet Land Areas
- Unit III** Landuse and Agriculture: Landuse Pattern, Agricultural Infrastructure, Agricultural Seasons, Food Crop, Cash Crop, Development and Prospect of Horticulture, Aqua-culture, Floriculture, Herbal Plants, Pisciculture, Agricultural Regions
- Unit IV** Industries: Agro Based Industries, Small and Cottage Industries, Prospects of Food and Fruit Processing Industries.  
Industrial Regions
- Unit V** Population and Settlement: Population Attributes- Growth, Distribution, Occupation, Age and Sex Ratio  
Evolution of Settlement : Types and Pattern,  
Morphological Features, Rural Dwellers

**Selected Readings:**
